Over-the-Counter Medicine Scavenger Hunt

DIRECTIONS: Complete the Medicine Scavenger Hunt using the sample Drug Facts Labels 1-20. The Hunt requires you to find the information that answers each question on the sample DFLs. If the answer is a drug, use the drug’s number(s) on the answer blank, rather than the name. If you see a number in parenthesis after a question like this (Q #1), the question you are currently answering refers back to another question.

1. DFLs frequently tell the consumer to store the medicine at ____. 
2. (Q #1) What is the most common range for ____-____ found on the sample DFLs?
3. Find the medicine that provides a measuring aid. What is the aid?
4. How many products contain acetaminophen?
5. What similar symptoms do the medicines containing acetaminophen treat?
6. List all of the drugs that could cause stomach bleeding.
7. What are the signs of stomach bleeding?
8. These products: #6, #10, #11, #13, #14, #15, and #19 all contain a Warning that they could damage a body organ. Which body organ is it?

You’re doing great so far!
